## Develop a chronologically secure knowledge of Stone Age technology

I know which tool were used when in the stone age.

I know why materials were chosen to make tools.

I can create my own stone age tools.

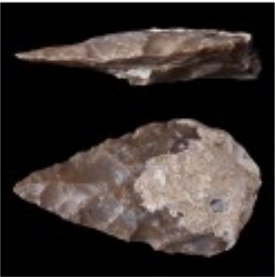

Why are the terms: stone, bronze and iron used to break up the timeline?

Because that was the main material people used for their tools at that time.

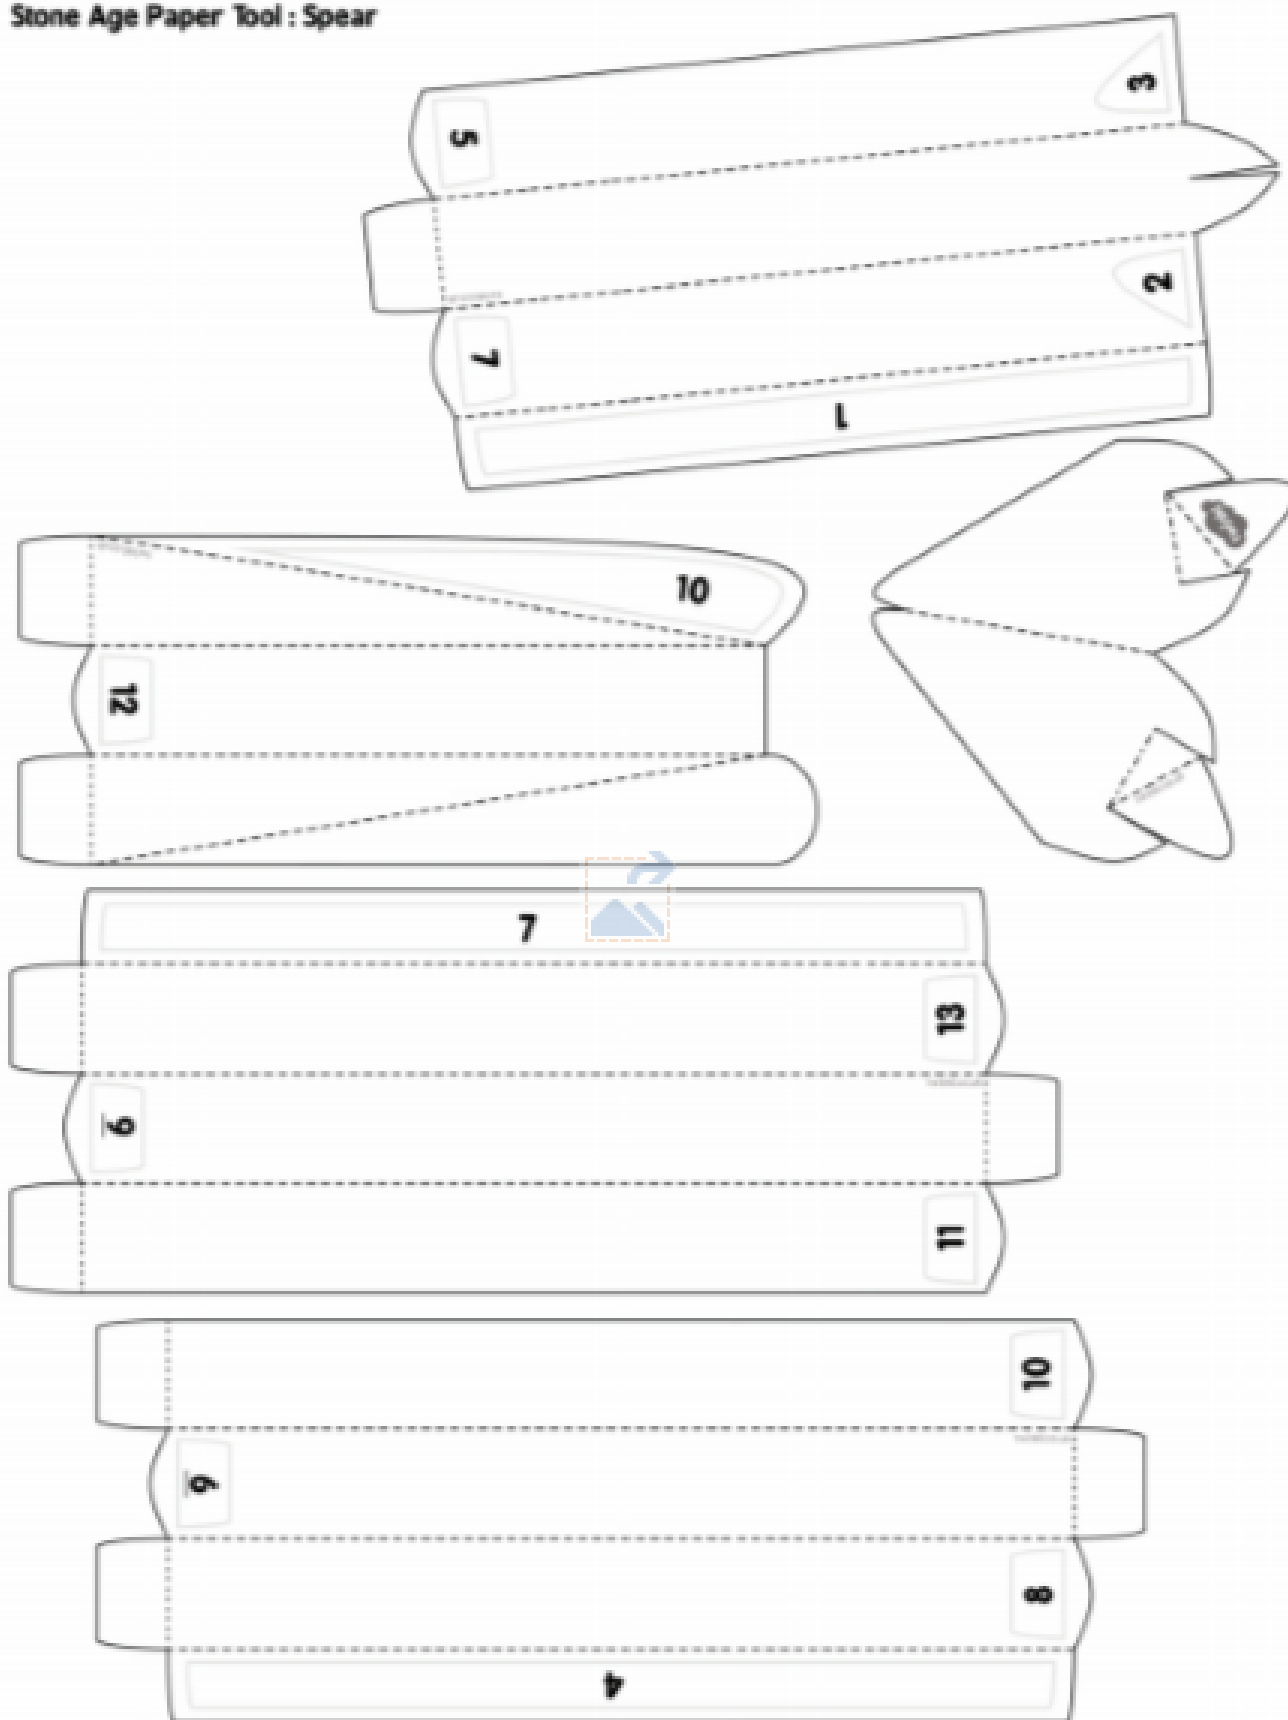

Some stone tools were still made in the Bronze Age - why do you think that

Task one: • Sort stone tools by date or time period

Task two: Create your own stone age tool  
Colour in and carefully cut out your template.
