

## PHSE –Summer 2

### Year 3/4:

#### Lesson 5 & 6:

L.O: I am aware of a range of different environmental concerns, both locally and globally.

I am able to research, discuss and debate issues related to the environment.

I am able to research and discuss my recommendations for improving the environment.

I am able to look at alternatives and explain my choices.

**Activity:** Over the next two weeks you will be doing your own research, choose one of the issues we are facing today in relation to climate change, plastic pollution, the environment.

Plan a presentation about your chosen topic. This could be a power-point presentation (if you have access to a computer) or you could make a poster using drawings, diagrams and fact boxes. Write about why the problem has occurred and what can be done to improve things.

To give you some ideas you could;

Look at the Go Givers PPT -The Earth in our Hands.

Look at the PPT -Plastic pollution -use the booklet to help you research

Look at the Blue Planet PPT (-use what you learnt in lesson 4)

Watch some BBC clips about how wildlife are affected.

<https://www.bbc.co.uk/teach/class-clips-video/science-ks2-blue-planet-live/zd9y7nb>

Why not find out about Greta Thunberg. Who is she? Why is she in the news?  
What does she campaign for?

We would love to see your finished project.
