

All good maps must have...

A compass rose

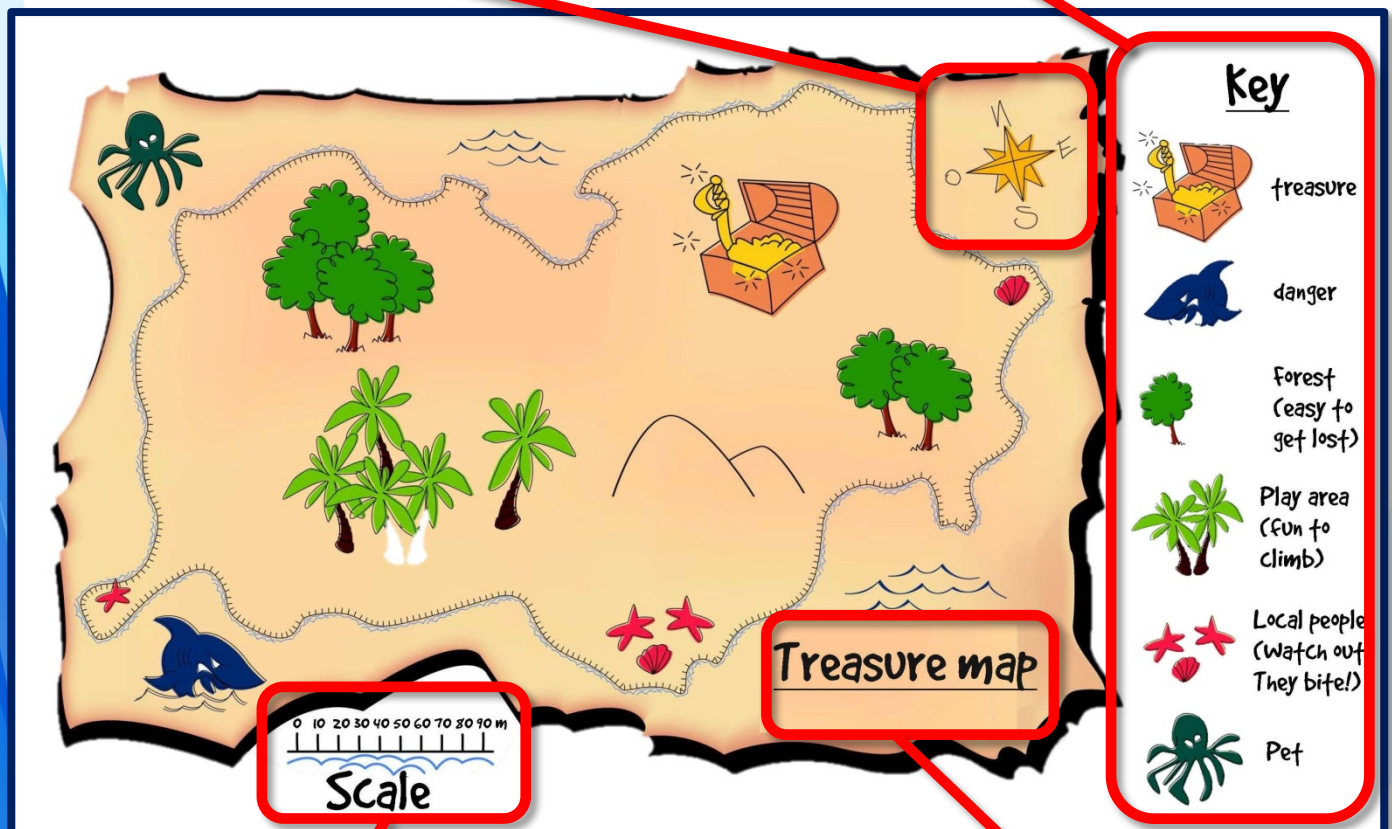

Why do we need a new one?

It helps us to know which way up the map goes and it helps us give directions.

A Key

What is this?

It lets us know what the symbols represent. Most symbols are easy to understand but not always.

A scale line

When would I use that?

When you wanted to know how far you were travelling.

A title

Is that not a bit obvious?

You are right, but you would be surprised how often it is left off.

Your task:

Applying what you know about maps so far, your task is to design a map of an imaginary place. You must ensure that your map has all of the following features:

- Title
- Scale line
- Compass rose
- Key
