

Adding or subtracting 10 can be done by representing or imagining a number as hundreds, tens and units and simply adding or removing one of the tens e.g.

		
$56 - 10 = 46$	56	$56 + 10 = 66$

Sometimes you will make a new hundred or need to break a hundred down into tens to be able to do this. e.g.

94 	94 + 10 	94 + 10 = 104  10 lots of 10 = 100 so a new 100 is made.
102 	102 - 10 We need to work with 10s so we break the hundred down into 10 lots of 10. 	102 - 10 = 92 Then we can take one away.
