

## Lesson 1: Can I add and subtract ones?

1.

True or False?

These four calculations have the same answer.

$$1 + 4 + 2$$

$$4 + 2 + 1$$

$$2 + 4 + 1$$

$$4 + 1 + 2$$

These four calculations have the same answer.

$$7 - 3 - 2$$

$$2 - 3 - 7$$

$$3 - 2 - 7$$

$$7 - 2 - 3$$

2.

True or false?

$$5 - 1 = 6$$

3.

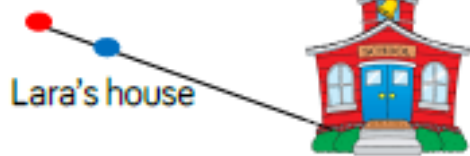

Continue the pattern

$$22 = 29 - 7$$

$$22 = 28 - 6$$

*Deeper thinking*

Sam's house

Sam lives 5km from school.

Laura lives 4km from school in the same direction.

What is the distance between Sam's and Laura's houses?

After travelling to and from school, Sam thinks that he will walk 1km more than Laura. Is he correct?

Explain your answer.

What will be the difference in distance walked after 2 school days?
