

Science week 2

Friday 15th January

As we said last week, our science topic is all about Plants. However, we feel that before we start on that it would be nice to do a winter walk observation.

Task: On one of your daily walks can you record what signs of winter you can see, hear, smell and touch. You can record this in words and pictures or even take a photograph of the things you notice.

I could see:...

I could hear:..

I could feel:...

I could smell:...

Please look at the plants and trees around- What can you find? What do they look like? Why are they different to spring? Can you find any snowdrops yet?
