

Dear Parent/Carer,

In Year 5, children will receive weekly Maths and English 'familiarisation' homework. This will be sent out on a Friday for the following week and children will have a choice as to the level of engagement they wish to have with this piece.

Level 1: Take the homework home and do nothing

Level 2: Take the homework home , read it and maybe discuss it with an adult.

Level 3: Take the homework home and produce some work to support their understanding. This could be completing the calculations or writing ideas down.

We hope that this will be a 'no pressure' approach to homework and will help you to have an understanding of what is being taught without the added pressure of completing set tasks. Your child will also feel that they have had the opportunity to familiarise themselves before the lessons and therefore feel more confident in that area of learning.

Thank you for your support
