

Monday 11th January 2021

I can make a prediction by using a picture clue.

Today in English we are starting a new unit, this unit will last 3 weeks. As always at the start of every unit we make a prediction about the text. Please have a look at my example which will show the questions I have and my prediction, then have a go at completing one independently.

Take a look at the following picture and note down 5 questions you have.

Once you have thought of 5 questions that you have about the picture, take a look at my example of how you can turn it into a prediction.

I do not think that the boy in the picture is lost as his body looks relaxed. I think that the woods is a friendly place and not spooky or haunted as I can see a squirrel and they are not normally an animal associated with danger. I predict that the boy is looking for his lost football.

Remember predictions are not always right and that is ok. Have a go at your own prediction for the following picture.
