

## Food Chains

We have been looking at living things. We have discovered what they need to survive, where they may live and what they need to live. This week we are going to look at food chains.

**Task 1:** Watch the video below to find out more about what a food chain is....

<https://www.bbc.co.uk/bitesize/topics/zx882hv/articles/z3c2xnb>

### **Key information:**

Plants get their energy from the Sun. They are called **producers** because they make their own food.

Animals are called **consumers** because they eat plants and other animals. They do not make their own food.

Animals that eat other animals are called **predators**. The animals they eat are called **prey**.

**Task 2:** Play this game to organise the food chain correctly...
