

## What do you want to ask?

We want you to think of the animals you've seen and read about. Think about the things you want to find out about those animals. Write down your questions and use the internet to find out your answers. You should see that all animals are suited to the environment (Home) that they live in and their bodies help them survive.

**We've started your questions for you...**

*Why do camels have humps?*

Why does a chameleon  
change Colour?

Why do rabbits have long  
ears?
